THEATRE OF THE SEA

Inspection

Type: ROUTINE INSPECTION

Date: JAN-27-2004

3.101

FACILITIES, GENERAL.

(a) Construction requirements.

(1) Indoor and outdoor housing facilities for marine mammals must be structurally sound and must be maintained in good repair to protect the animals from injury, to contain the animals within the facility, and to restrict the entrance of unwanted animals.

A low concrete barrier in the main sea lion area is chipped and crumbled in some areas. One edge of this structure is exceptionally rough with sharp edges. The concrete ledge of the pool which runs under the slide has large cracks in multiple areas and pieces missing from the surface. These concrete areas should be repaired or replaced to ensure structural integrity and prevent possible injury to the animals.

Correct by: February 27, 2004.

3.107 (c)

3.107 (d)

SANITATION.

(c) Housekeeping. Buildings and grounds, as well as exhibit areas, must be kept clean and in good repair.

The floor of the freezer is covered with a wooden slat surface that is broken in several areas. Fish pellets, papers and other debris are littering the floor. The floor should be replaced or repaired to meet acceptable maintenance standards. The freezer should be kept clean and uncluttered to facilitate sanitation procedures.

Correct by: February 27, 2004.

(d) Pest control. A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests must be established and maintained.

The fencing which was designed to control stray cat entry into the facility is in disrepair on the north end of the facility. As part of the mammalian pest control program this fencing was added to the perimeter fence to help ensure unwanted animals did
